WORLD'S NO.1 SELLING MATTRESS

全球銷量冠軍床褥

Sealy Posturepedic - The World's No.1 Selling Mattress

Sealy Posturepedic is the number one choice of bedding with over 35 million people worldwide experiencing the benefits of a better night's sleep. Developed in conjunction with leading orthopedic surgeons, Sealy Posturepedic has been providing superior comfort and support for over 50 years. You can be sure that every bed meets the most exacting standards laid down by Sealy.

What does 'Posturepedic' mean? 'Posture' refers to the position of the human anatomy as a whole. 'Pedic' is an abbreviation of orthopedic, which is described as the medically correct position of the skeletal structures of the body.

The orthopedically correct support of Sealy Posturepedic is provided by a unique sleep system which ensures comfort where you want it and support where you need it. Sealy's innovative sleep system has been developed through the use of scientific testing and research methods including spinal mapping, imaging analysis, and Sealy's very own 'DataMan'.

絲漣睡姿健床褥 - 穩佔世界銷量第一位

世界銷量冠軍的絲漣睡姿健床褥，由多位頂尖矯形外科醫師研究而成，每晚為全球超過三千五百萬人帶來優質睡眠體驗。每一張由絲漣製造的睡姿健床褥，生產過程均符合最嚴謹的質素監控標準。過去五十多年來，為顧客帶來最舒適及健康的睡眠享受。

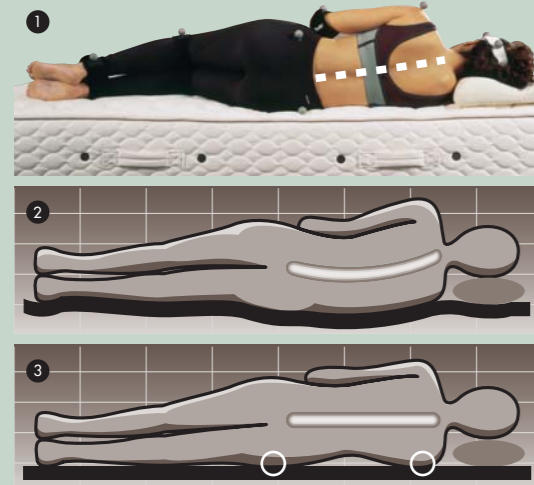

睡姿健(Posturepedic)源自Posture及pedic兩詞。Posture意指人體結構的姿勢；而pedic則源自orthopedic(矯形)，意指在醫學角度上，身體骨架處於最正確的位置。

絲漣睡姿健的獨特三重組合系統，是多位醫學專家努力研究的成果。絲漣通過各項嶄新的科學測試及研究方法，包括脊椎描繪、圖象分析與及由絲漣發明的電腦機械人驗證產品成效，確保床褥能對人體各不同的部位提供最理想及舒適的承托。

SEALY POSTUREPEDIC CARES ABOUT YOU

絲漣睡姿健為你全面照顧周到

- 1 Correct skeletal alignment ensures maximum body rest throughout the night.
睡眠時，身體骨架應該保持平直，確保身體獲得充份休息
- 2 A soft mattress will not provide enough support.
床褥太軟，承托力不足
- 3 A firm mattress creates pressure points at the shoulders and hips.
床褥太硬，肩膀及臀部所承受的的壓力特別大

Correct support rejuvenates you night and day

Sealy Posturepedic integrates the best in orthopedic research and sleep system design to provide the correct support for every 'body'.

A mattress that's too soft will not provide enough support to keep the spine correctly aligned. This causes tension, as your muscles work to compensate for the problem, leaving you tired and aching in the morning.

A mattress that's too firm will not support all parts of the body evenly. It tends to create pressure points at the shoulders and hips, reducing blood circulation. This is what causes many people to toss and turn and complain of never being able to feel comfortable.

The Sealy Posturepedic support system is designed in conjunction with leading orthopedic surgeons to provide correct skeletal alignment and support during sleep. This ensures maximum body rest throughout the night, leaving the sleeper feeling rested and rejuvenated in the morning.

提供最佳承托力 讓你時刻精神煥發

絲漣睡姿健將矯形醫學的科研成就，運用在床褥設計上，確保床褥能為每一位睡眠者提供最理想的承托。

太柔軟的床褥，會因承托力不足而導致使用者脊骨不能保持平直，背部肌肉因而在整個睡眠過程中都會不斷勞動，試圖校正脊骨的姿勢。當你早上起床時，便會感到特別疲倦及出現背痛癢狀。

相反來說，如果床褥太堅硬的話，便不能均衡承托身體所有部位，承托點只會集中在身體較重的部位，如肩膀及臀部。由於這些部位受到特別大的壓力，導致血液循環減少，為了舒緩不適，睡眠者便會整晚不自覺地輾轉反側，難以進入熟睡狀態。

絲漣睡姿健床褥由多位世界頂尖矯形外科醫師參與設計，為睡眠者提供最均衡的承托，保持身體骨架自然平直，讓你在睡眠過程中，全身肌肉得以鬆弛，獲得真正充份的休息，一覺醒來，自然感覺精神飽滿、活力充沛。

Comfort Support Durability

Correct comfort delivers total body relaxation

The patented design of Sealy Posturepedic, combines unique comfort layers to produce the ultimate in comfort and conformability for your individual body shape. The innovative combination of premium comfort materials offers you a choice of comfort designed to suit your needs. Conforming body cushioning combined with correct support delivers total muscle relaxation and eliminates pressure points which restrict blood circulation. This means that you will enjoy deep restful sleep and wake up ready to meet the challenges of the new day.

提供最舒適睡眠 讓你全身真正鬆弛

絲漣睡姿健床褥的專利設計，配合獨特的舒適內層墊料，順應人體姿勢提供均衡承托，提升睡眠的舒適享受。絲漣睡姿健床褥系列，備有不同的舒適內層墊料組合，以配合顧客的不同需要，使睡眠者在睡眠過程中，令全身每個部份得到最貼身的承托，肌肉可完全鬆弛休息，並避免因受壓而影響血液循環，醒來感覺煥然一新。

Durability ensures maximum value for money

Sealy Posturepedic combines the best quality craftsmanship and materials to provide maximum durability of the sleep system. Sealy has unique features like natural cotton felt, which keeps its resilience year after year and EdgeGuard which provides extra strength to the sides and ends of the mattress. The spring unit is twice tempered, once when each individual spring is produced and again when the entire mattress unit is assembled ensuring the high performance characteristics of the mattress unit are retained throughout the life of the entire sleep system.

產品恆久耐用 絕對物超所值

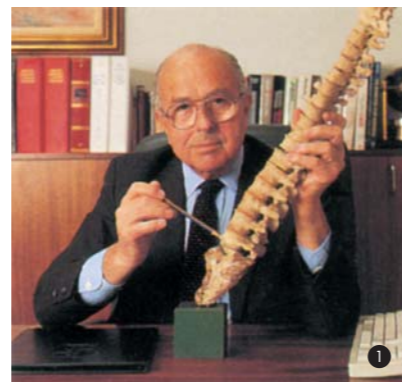

絲漣睡姿健床褥採用最優質的物料及手工藝製造，確保產品恆久耐用，包括採用天然純棉墊為內層墊料，令床褥不會輕易變形；四面護邊(EdgeGuard)設計令床褥週邊更堅實強韌；彈簧在個別製造時及聯結組合後先後經兩次高溫定型處理，保持床褥的恆久彈力及耐用性。

RESEARCH AND DEVELOPMENT

研究及開發

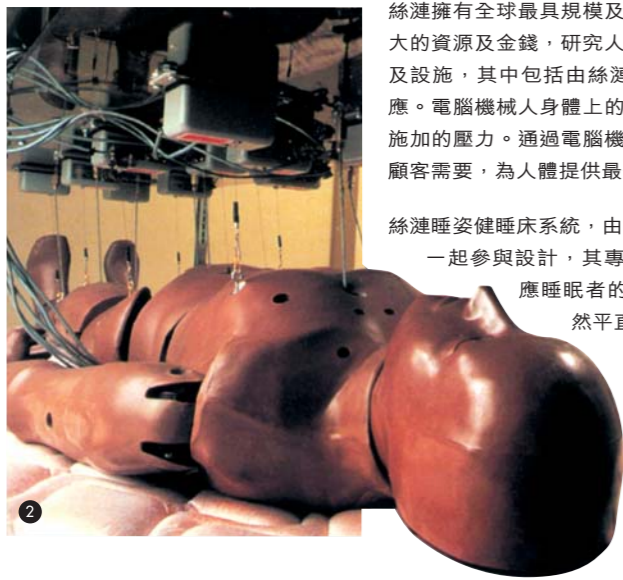

Sealy maintains the world's largest and most advanced research and development center and testing laboratory. Sealy spends more time and resources on sleep research and product development than any other bedding manufacturer. In their highly specialized facilities, Sealy has created a life sized computerized being called DataMan. DataMan is equipped with electronic measuring devices, located at strategic body points and is able to accurately simulate the weight, movement and responses of the average body on a bed. When DataMan is lowered onto a sleep surface, the computer automatically records critical body displacements and angles. DataMan enables Sealy scientists to determine whether a bed design meets consumers' needs in terms of comfort and support.

The Sealy Posturepedic system is designed in cooperation with leading orthopedic surgeons led by Dr. R.G. Addison of the Chicago Rehabilitation Institute, a world authority on relieving back pain. Its patented Posturetech coil with Sensory Arm is specially designed to sense the shape, weight and movement of the sleeper's body then provide correct skeletal alignment and support to a person in the sleeping position.

絲漣擁有全球最具規模及最先進的床褥研究及測試中心，並在全球床褥製造業者中，投入最龐大的資源及金錢，研究人體睡眠姿勢，開發及改良產品。研究中心內配備有最先進的科學儀器及設施，其中包括由絲漣發明的電腦機械人，可準確地模擬人體的體重、睡眠時的動作及反應。電腦機械人身體上的重要位置附有電子測量裝置，自動紀錄主要轉移動作、角度及對床褥施加的壓力。通過電腦機械人的先進測試結果，絲漣的研究人員便可確保床褥設計能真正滿足顧客需要，為人體提供最佳的承托力，並帶來最舒適的睡眠享受。

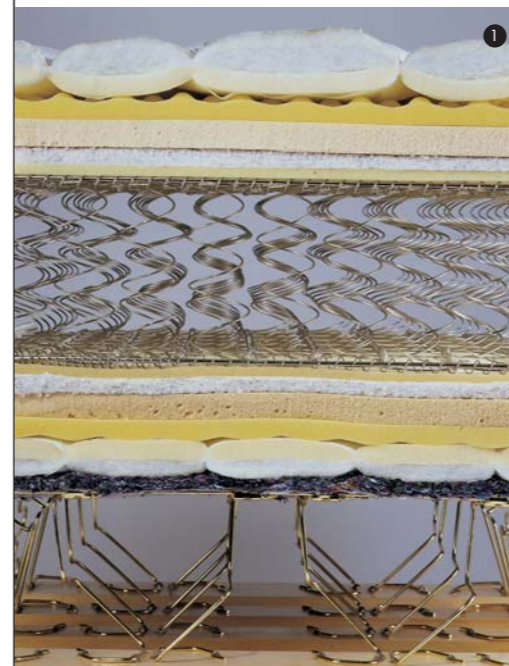

絲漣睡姿健睡床系統，由芝加哥康復中心的Dr.R.G.Addison所率領的頂尖矯形外科醫師顧問團一起參與設計，其專利的睡姿健感應彈簧(PostureTech® coil)附有特別的感應臂，可感應睡眠者的身體形態、重量及動作，自動作出相應調節，令睡眠者的骨架保持自然平直姿勢，並均衡承托身體重量。

THE UNIQUE TRIPLE SYSTEM DESIGN

獨一無二的三重組合系統

COMFORT SYSTEM
舒適內層墊料

SUPPORT SYSTEM
高效能承托系統

FOUNDATION SYSTEM
扭力桿減壓床架

Inside every Sealy Posturepedic, there are three systems (COMFORT, SUPPORT, FOUNDATION) carefully engineered 'sleep systems', that have been designed to work in harmony to provide maximum comfort, support and durability.

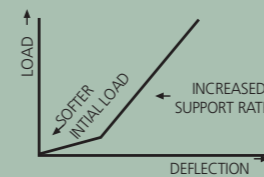

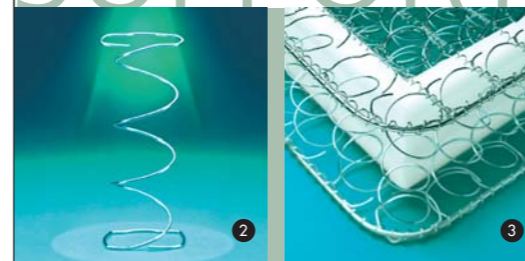

This 'triple system' approach to bedding design is unique to Sealy and it explains why Sealy Posturepedic is the world's largest selling bed.

每一組絲漣睡姿健睡床均由三個部份組合而成—舒適內層墊料、高效能承托系統及扭力桿減壓床架。三層組合相輔相乘，除了為睡眠者提供無可比擬的舒適承托外，更可加強產品的耐用性。

絲漣獨特的三重組合系統，傲視同儕，令絲漣睡姿健睡床多年來一直穩坐世界銷量冠軍寶座。

1 Sealy Posturepedic High Performance sleep system. 絲漣睡姿健睡床高效能三重組合系統

SUPPORT SYSTEM

LOAD DEFLECTION ANALYSIS
彈簧負重感應分析

- 2 PostureTech coil with Sensory Arm. 附帶感應臂的睡姿健感應彈簧
- 3 EdgeGuard gives you edge-to-edge stability. 四面護邊設計，為床褥周邊提供特強的承托
- 4 Load Deflection Analysis measures innerspring resistance to gradually increasing body weight. 「彈簧負重感應分析」圖表量度彈簧在承受不斷增加的壓力時所提供的承托力

THE SUPPORT SYSTEM 高效能承托系統

PostureTech® coil

The patented PostureTech® coil with Sensory Arm™ feature senses your movement and responds to provide correct support. The sense and respond support system reacts to the needs of your back and body, providing an unprecedented combination of support and conformance.

This advanced coil technology can be explained by Load Deflection Analysis which measures innerspring resistance to gradually increasing body weight. The unit gives very easily at first during its initial response and then firms as more weight is applied, resulting in the unique Sealy Posturepedic Load Deflection Curve. The result is a superior orthopedically correct mattress surface for every 'body' - no matter what size or shape you are.

'Triple offset' design

Refers to the head shape of all PostureTech® coils, a third side of the coil is flattened to provide greater support at the edge of the mattress. These patented PostureTech® coils are uniquely shaped to provide effective head-to-toe hinging action and superior body conformance, while preventing 'roll together'.

Twice-tempered steel

Coils are made from high carbon spring steel and are individually tempered to ensure greater resilience, once assembled, the entire support system is tempered a second time in a high temperature oven. This ensures the high performance characteristics of the unit are retained through the life of the entire system.

Patented EdgeGuard™

EdgeGuard™ is an engineered, polyethylene insert placed around the entire perimeter of the mattress to provide superior edge-to-edge stability. The inclusion of EdgeGuard™ effectively extends the sleep surface by an average of 10% as well as providing a firm seating edge.

睡姿健感應彈簧

專利設計的睡姿健感應彈簧(PostureTech® coil)附帶的感應臂，可感應人體動作，順應睡眠者的背部姿勢及重量，作出相應的適當承托。換言之，睡姿健感應彈簧帶來了前所未有的科技突破，將矯形醫學運用在床褥設計上，彈簧可隨著睡眠者所施加的壓力遞增，自動調節承托力，為不同體形及重量的人體，提供最理想及舒適的承托。「彈簧負重感應分析」圖表量度彈簧在承受不斷增加的壓力時所作出的反應顯示，當最初彈簧承受較輕壓力時，床褥給予睡者感覺比較柔軟，但隨著壓力增加，彈簧便相應調節及增強本身的承托力，提供最理想及舒適的矯正承托。

三向直邊彈簧設計

睡姿健感應彈簧的專利設計，以三邊呈方形的彈簧，取代一般的圓形彈簧。這項設計的優點是由於彈簧並非緊密連結，可避免互相之間糾纏擠壓，令床褥上出現欠缺彈力的部位，其獨特的連結方式，給予睡眠者最貼身的承托及減少對伴侶造成的騷擾。

彈簧鋼絲經兩次高溫定型處理

彈簧採用高碳鋼絲製成，每個彈簧首先經過一次高溫定型處理，加強其彈性及耐用性。彈簧經聯結組合後，再被放進高溫焗爐中進行第二次定型處理，確保床褥即使經長時間使用，仍能保持原有的堅韌性及彈力。

專利四面護邊設計

床褥圍邊以堅實的聚乙烯泡沫材料製成，令床褥周邊提供特強承托，更可將睡眠面積增大10%，坐於床褥邊緣亦覺堅固穩定。

THE COMFORT SYSTEM 舒適內層墊料

Sealy Posturepedic features 100% natural cotton felt in conjunction with layers of premium latex or Sealy foam. The innovative comfort layers will provide resilient body cushioning and conformability year after year.

Exclusively imported Belgian Damask gives Sealy Posturepedic beds an elegant appearance and a luxurious feel. With the added protection of the anti-microbial and fire retardant treatments on the Damask, the Sealy Posturepedic mattress is sure to provide you with the ultimate in sleep comfort.

Health-Shield™ Treatment

Health-Shield™ is an anti-microbial treatment developed to inhibit the growth of dust mites, bacteria, mould and mildew. It provides you and your family with an effective way to assist in the management of asthma, eczema and other allergies.

Fire Retardant Treatment

All Sealy Posturepedic mattresses comply with the specification for resistance to ignition of mattresses, divans and bed bases (for the use in domestic premises) BS7177: 1996 Cat 1.

THE FOUNDATION SYSTEM 耐用床架設計

The Sealy Posturepedic Shock Abzzorber® Foundation System

Sealy Posturepedic is scientifically engineered as a total sleep system. The unique 'Torsion Bar' foundation unit delivers consistent firmness and long term durability. The patented Torsion Bar support modules are constructed from heavy duty spring wire and work together to act as a 'shock absorber' for the mattress. Unlike the conventional boxspring, torsion bars cannot move sideways and ensure that the mattress does not sway on its base. The use of Sealy Posturepedic Shock Abzzorber® foundation can effectively extend the life of the mattress, and improve its performance by more than 30%.

絲漣睡姿健「扭力桿減壓結構」床架

絲漣睡姿健組合系統之底層床架，採用最先進的「扭力桿減壓結構」設計而成。由高性能鋼料製成的扭力桿，除具有吸收震盪的作用外，並提供堅固穩定的承托。床褥置身其上，亦不會向左右搖擺，更可增加床褥耐用時間高達30%。

絲漣睡姿健床褥採用100%天然純棉墊配優質天然橡膠或絲漣乳墊製成的內層墊料，經年使用後，仍然富有彈性及保持貼身的感覺。

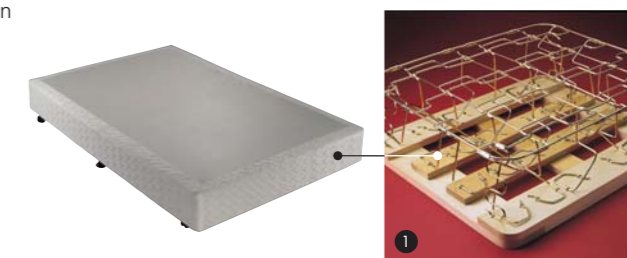

床褥裡布採用優質的精緻錦緞，優雅華貴。錦緞更經過多項防菌及阻燃處理，符合國際標準，為睡眠者提供多重保護，讓你絕對睡得舒適安心。

Health-Shield™ 衛生處理

床褥經特別衛生處理過程，隔除各種微生物，如蟎蟲、細菌、黴菌及霉菌，有效保障使用者的健康，為患有哮喘及易患上濕疹或其他敏感症狀的人士提供多重保護。

阻燃處理

所有絲漣睡姿健床褥均符合英國的BS7177:1996 家用產品阻燃標準。
